

Pinwo

Logo variations

The default Pinwo logo has one color: Pinwo red. It's the one color that's central to our visual identity. For maximum impact, the red logo appears on a white or light-colored background. Use the white version on dark or busy backgrounds. Use the full logo on broad external communications to build awareness of the brand as well as the "P" bug.

The "P" bug

The "P" bug can be used separately from the Pinwo logo in situations where the viewer already has high brand awareness.

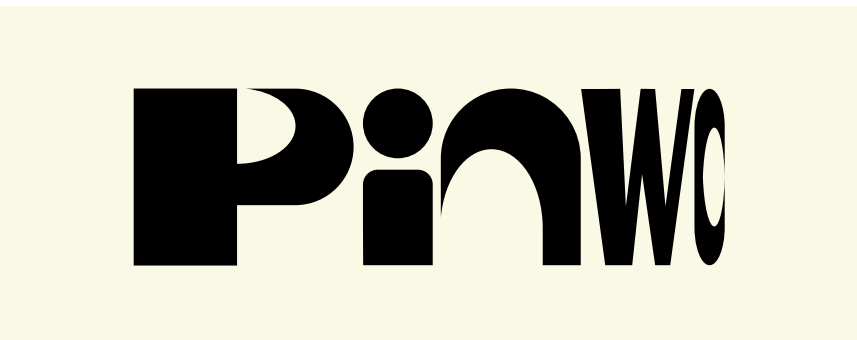

1-Color logo: Red
This is the version we should use in most cases.

1-Color logo: White
Use this version for better legibility and contrast on darker backgrounds.
[Pinwo-Logo-W](#)

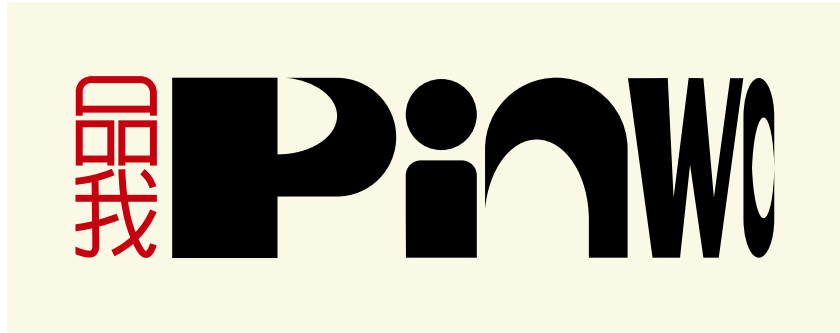

1-Color logo: Black
This version should only be used if black is the only color allowed in a layout. In most cases this version is for product only.

Logo clearspace

So the logo is legible, and to maintain its integrity, keep the area surrounding it free of other elements. The amount of clear space is the width of the “p” by 1/4.

Logo minimum sizes

The minimum size of our logo and [P] is .25 in (6.35mm) in print, or 21px on screen, measured by the height of the [P]. On rare occasions, smaller sizes for print may be necessary.

Logo treatment

For maximum impact, default to the red version whenever you can. Use the white version on dark or busy backgrounds. When using the one-color version of our logo, the color of the background will show through the “p” bug. Make sure to place the logo or “p” bug where it’s legible and there’s enough contrast.

Solid color background

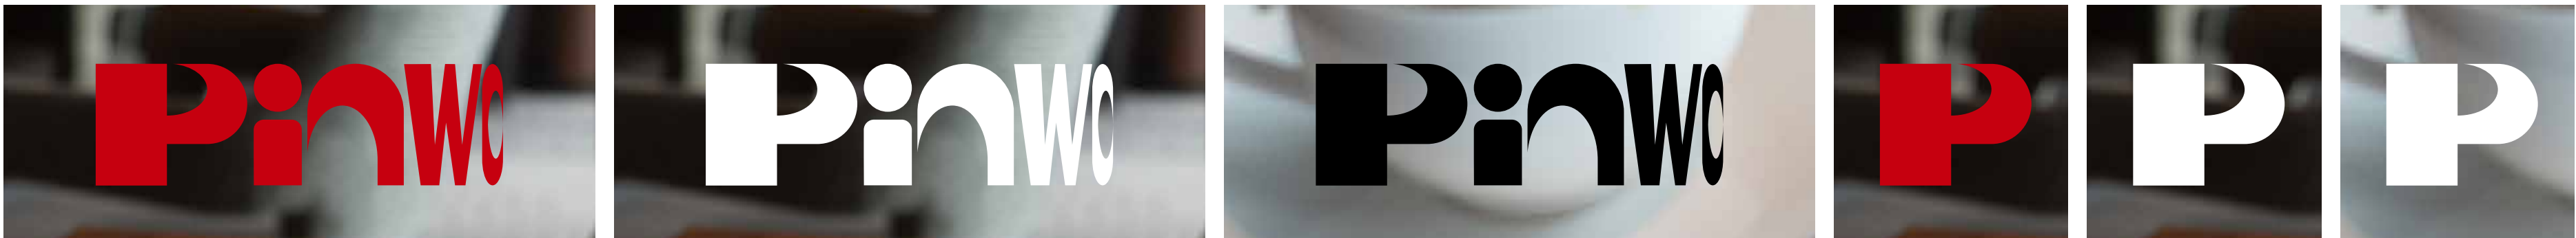

Image background

Don't place the logo on a busy background.

Logo misuse

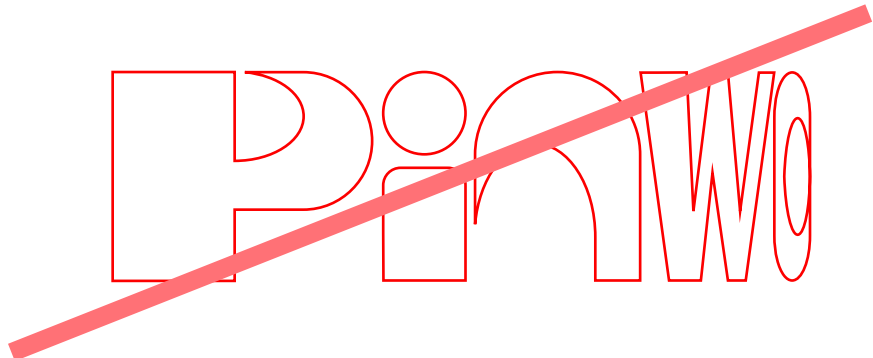

Don't modify or distort our logo.

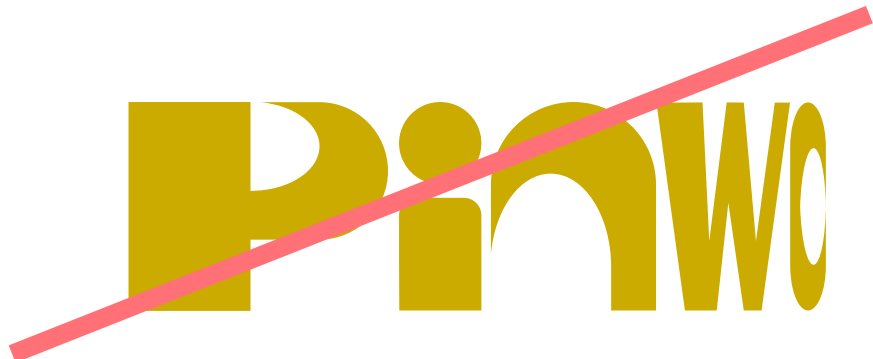

Don't add drop shadows or use effects.

Don't slant or alter positioning.

Don't outline the logo.

Don't alter colors.

Don't use gradients.

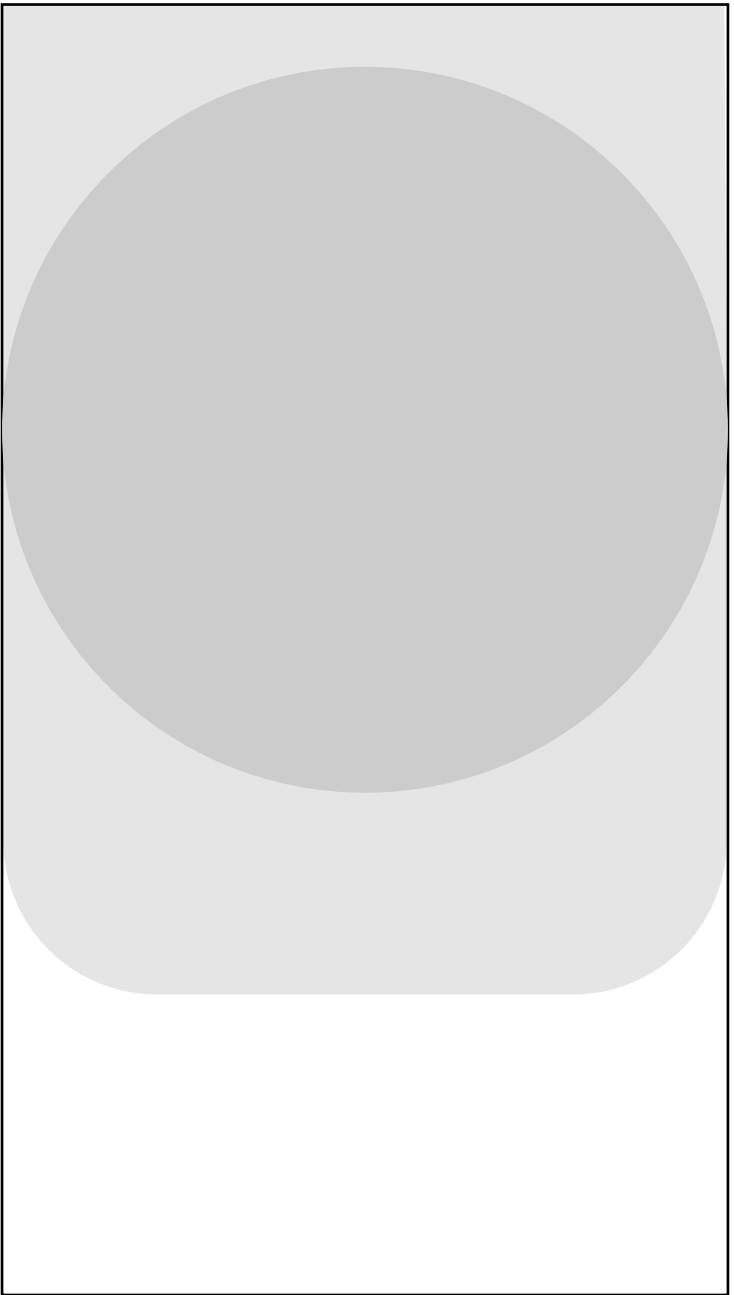

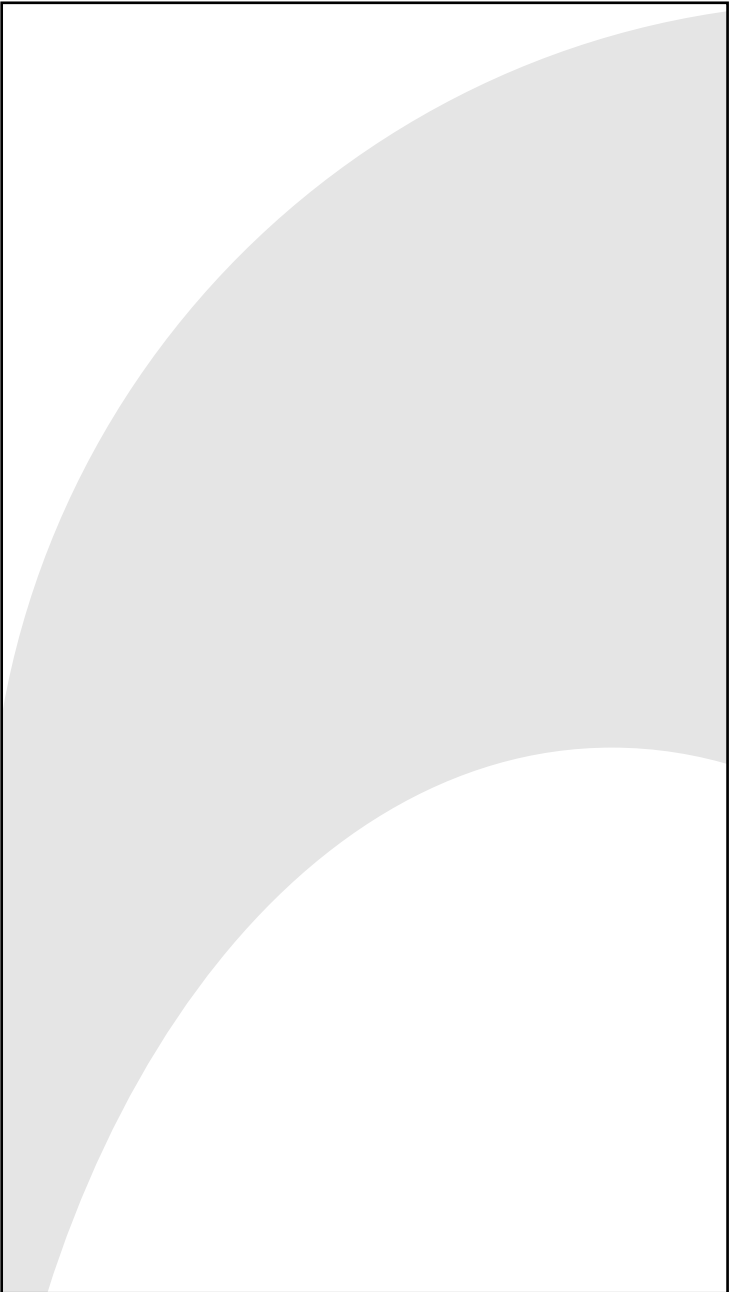

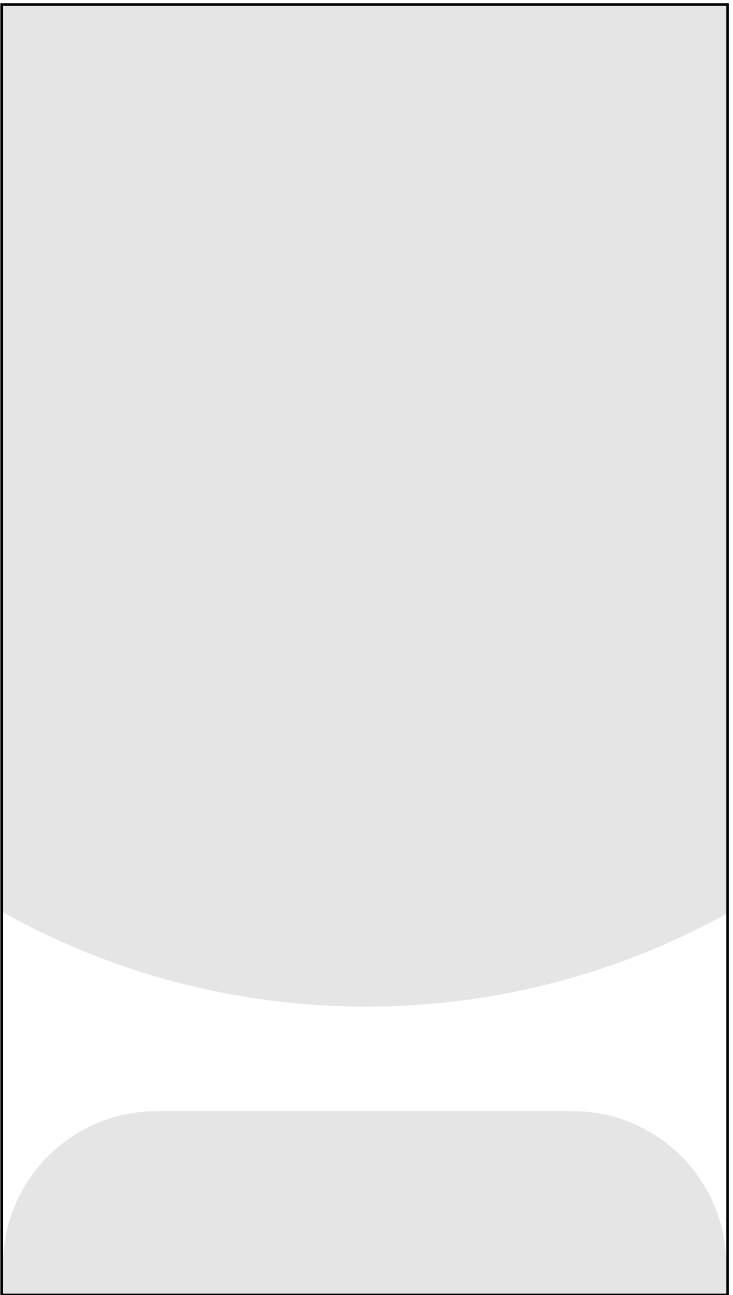

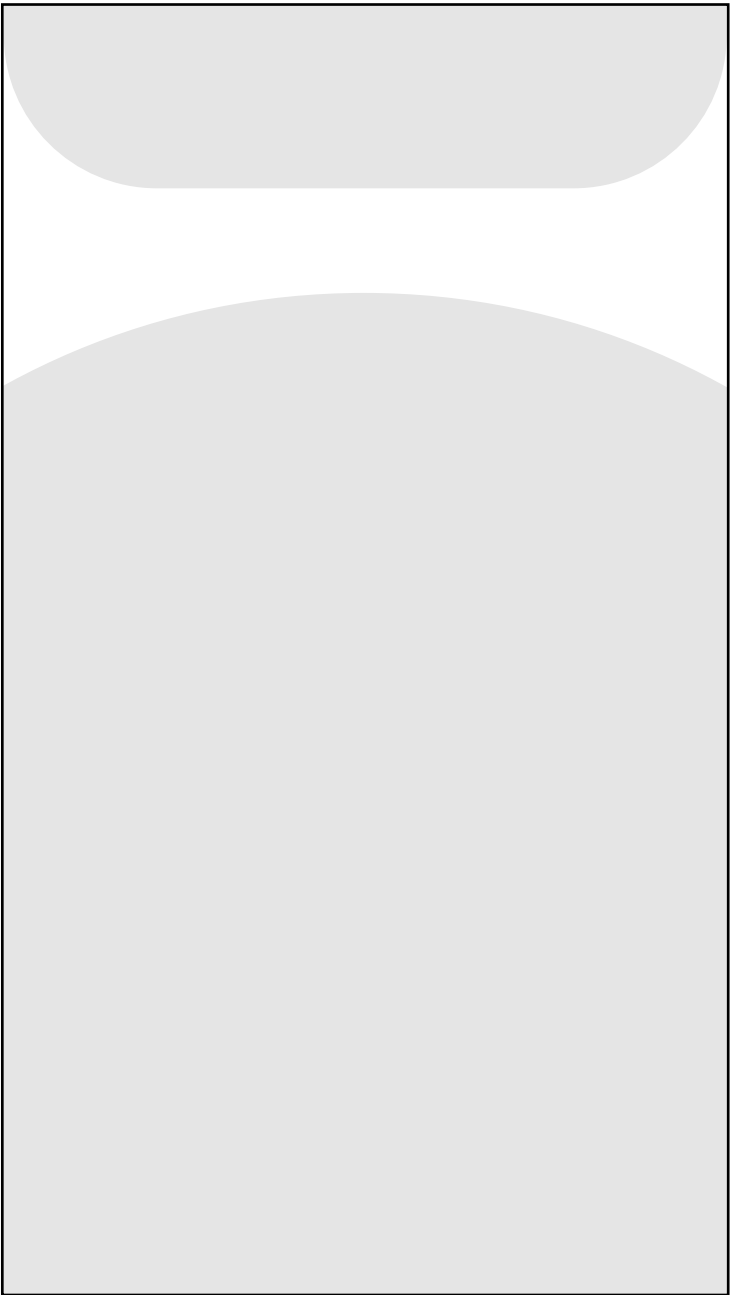

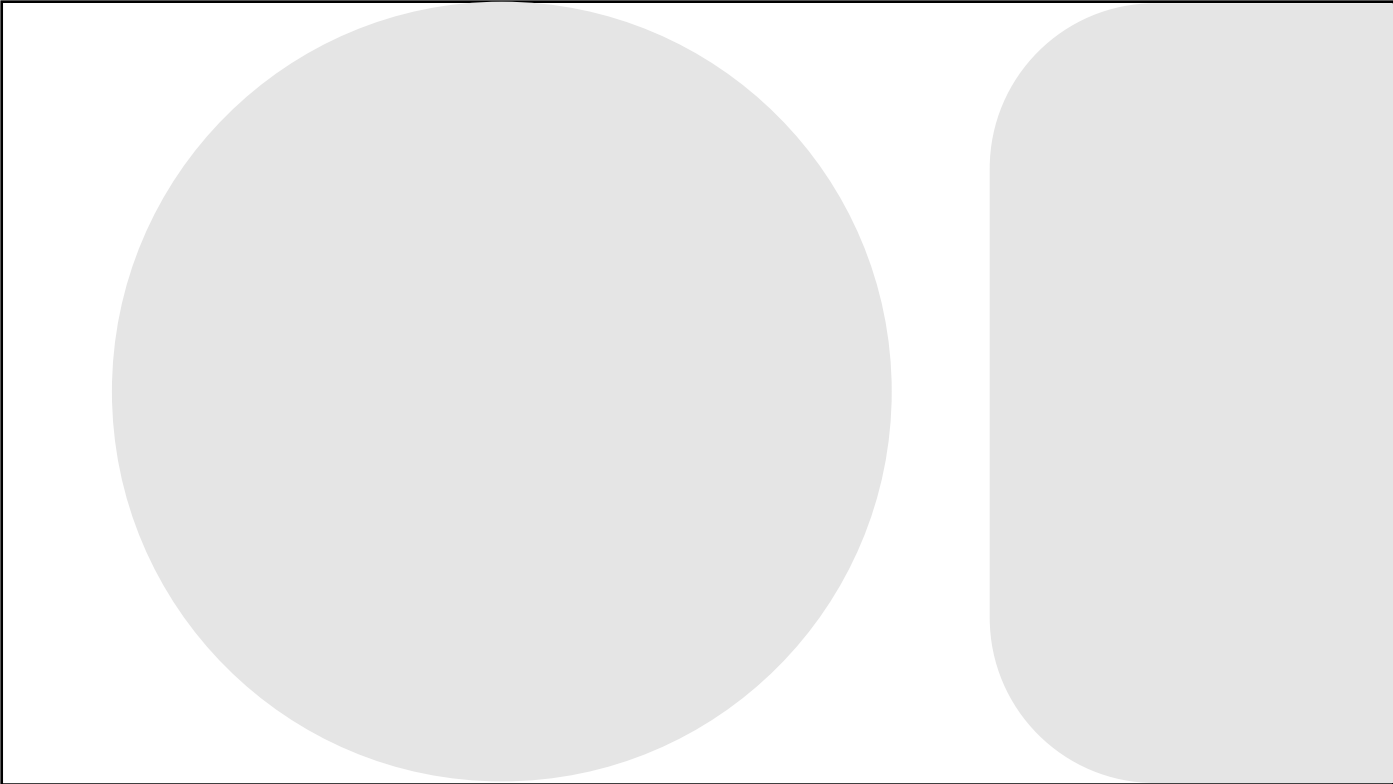

Don't use the logo on top of a busy background or on top of an image where legibility becomes an issue.

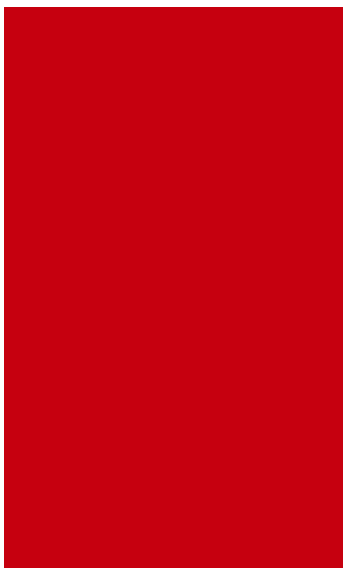

Don't change the radius.

Core color selection

Our color palette is divided into two sections—a core selection and a supporting selection. The coreselection includes warm and rich colors.

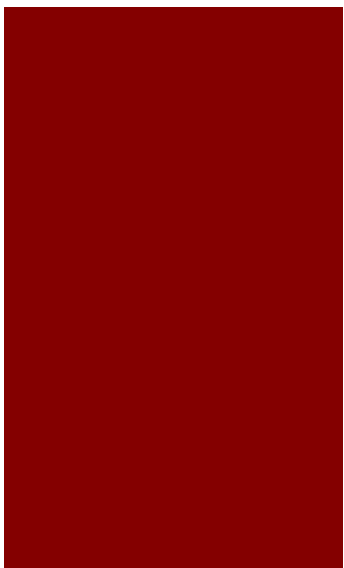

RGB: 181/31/31
#: b51f1f
CMYK:20/100/100/0

RGB: 132/132/25
#: 848419
CMYK: 11/99/100/0

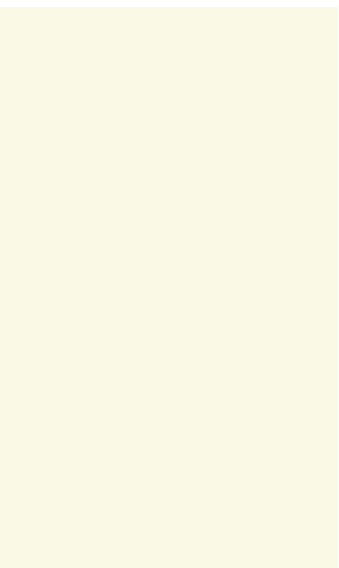

RGB: 102/117/60
#: 66753c
CMYK: 69/48/98/7

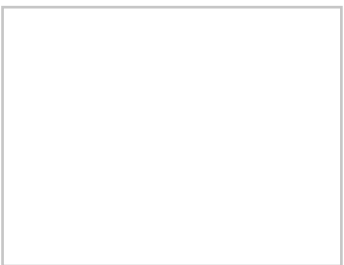

RGB: 120/10/9
#: 780a09
CMYK: 46/100/100/21

RGB: 81/70/70
#: 514646
CMYK: 69/72/66/27

RGB: 249/249/232
#: f9f9e8
CMYK: 4/1/14/0

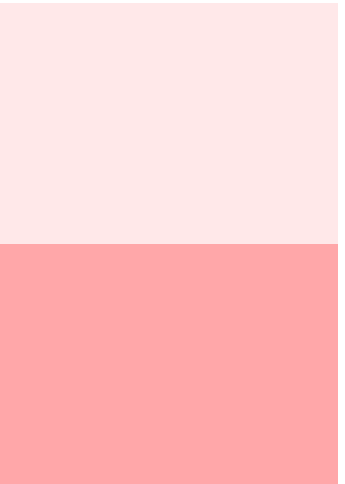

RGB: 255/255/255
#: FFFFFFFF
CMYK: 0/0/0/0

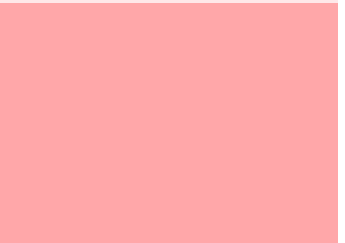

RGB: 43/40/40
#: 2b2828
CMYK: 79/77/75/54

Supporting color selection

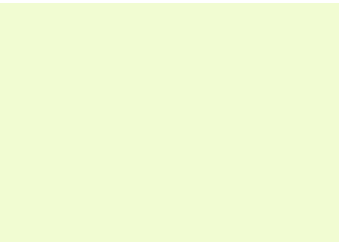

Our supporting color selection complements the core selection and can be used for accents. Supporting colors are juxtaposed with core colors to create dynamic, vibrant, and unique expressions.

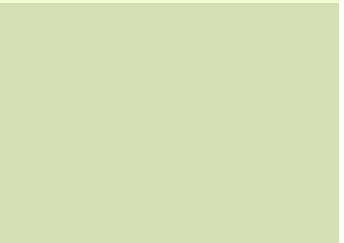

RGB: 255/233/233
